13-3775 Kalapana Hwy, Pahoa,  
Island of Hawaii, HI 96778

### Is This Your Business?

The vents are naturally formed openings in the Earth where heated steam rises.  
Crowd: Mixture of people...gay, bi, curious.

I was just there a week ago and had very hot sex with 2 locals. They were very fit guys, one with a huge cock, the other devoured my cock with his ass. It's a great place for outdoor sex.

Commented on 10/30/2008 11:13:10 AM

Hey guys,  
I've received a report that this area is no longer accessible to the public.  
Please let other guys know what you know by posting comments.  
Ed

Will be there in September. Can anyone give a more accurate description for directions? Looking forward to checking it out!

Commented on 11/18/2007 1:42:54 AM

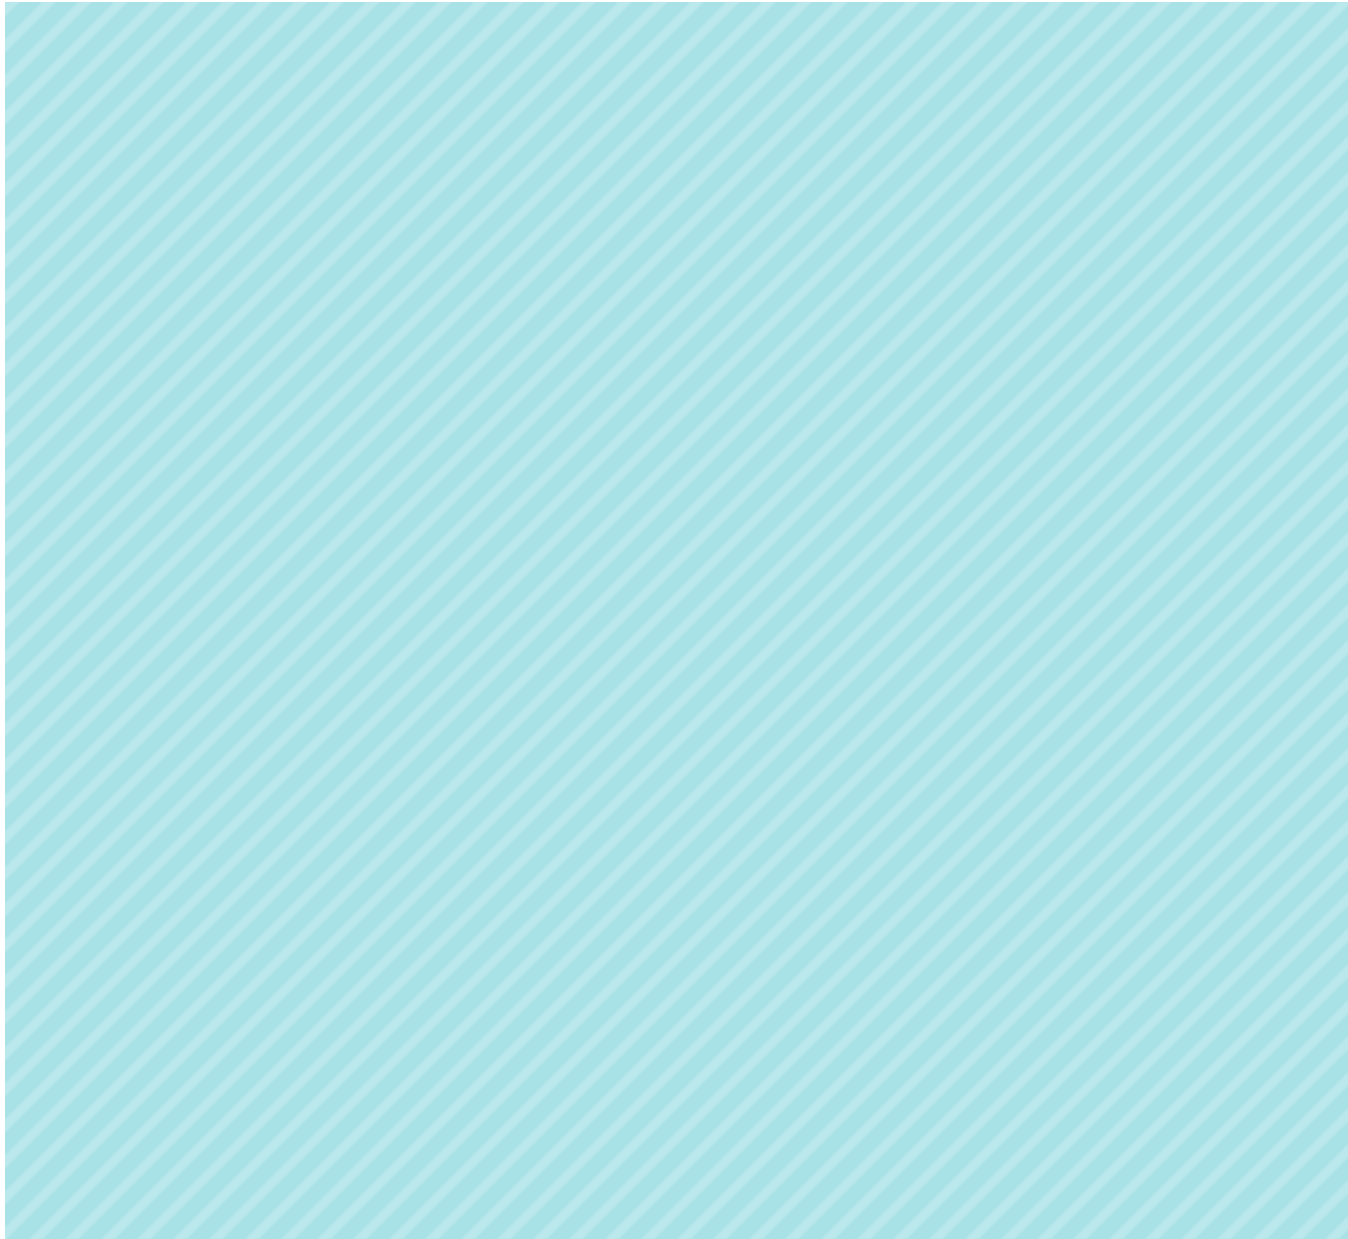

Yes, this a most "cool" spot to explore.  
BUT BE CAREFUL. Can be dangerous in that rocks are sharp and trecherous.  
right off the road, but can go nude easily all over the area, tho' few do.  
Yes a mixed group of people come here, so be polite and be caring to the land-TAKE  
OUT YOUR TRASH; this is not a maintained park.  
Can be very cruisy at times, but also can be a "lonely" attractive spot.  
Have seen numerous erections here, (and I do not frequent this place often) YET  
straights like to go play here too

This is one of the most intriguing and beautiful places I have been....almost other-worldly. There are several vents that locals have placed ladders down in to enter....several are more "craterlike" and are on the surface. None the less, the steam that is generated from the ground water hitting the hot volcanic rock and makes it way to the surface is relaxing and intoxicating. It is a known cruising area and both locals and tourists stop by. Not a tremendously popular spot for hooking up, but it can happen. If you don't get lucky with hooking up, you will get lucky in having visited a very unique and visually intriguing location.
