No hack. The source is indeed whatdoesitmean.com, a known disinfo site.

Incidentally, this popular picture of David Booth.....

...turns out to also be identified as A. True Ott, PhD which may or may not be true. I'm thinking not true. What kind of a name is that? At least "David Booth" is more plausible.

Rabid hater of Jews.

Fake "PhD" and "ND" degrees.

CIA/FBI/NSA dis-info specialist.

Works with a group of agents who target activists.

Ties to Neo-Nazi and Satanic cult groups linked to murders.

A True Ott Exposed

Los Angeles, CA --Death threats e-mailed to two journalists, sent by a fake doctor using a half dozen aliases, directs Justice Department investigators to an anti-government, Bush-hating, crime-ring believed involved in the January 8, 2011, shootings of Arizona's chief federal judge John Roll and Congresswoman Gabrielle Giffords, according to court documents filed in California.

Investigative journalists Sherri Kane and Dr. Leonard Horowitz are filing charges with the FBI in San

Francisco, the Superior Court of California, and the San Jose police department, seeking protection from a man named "Dr. True Ott" of Ogden, UT, claiming the unaccredited doctor of nutrition is an accomplice in a conspiracy to assassinate political targets and journalists.

Point being we have no idea what the real source of Faal/Booth articles is because it is intentionally obfuscated.
