3 results

whether the results are comprehensive.

Addresses

Address history is compiled based on the subject's given name and aliases from both private databases and many publicly available sources. Landlords and employers often use the address history to confirm the validity of the subject's previous addresses.

Accuracy * * * * * Coverage * * * * *

"Accuracy" refers to the quality of records returned for a search. This score helps you understand "Is the data right?" and "Is this record for the right person?"

"Coverage" refers to the depth of the search. Many public record databases are not digitized, so this score helps you understand whether the results are comprehensive.

Possible Relatives

Possible relatives are based on matching names and household members within the same geographic location as the subject. Please note that this will not include all relatives - especially for anyone living outside the United States - and may not be a precise reflection of true relatives.

No relatives found in our records

A comprehensive search was conducted and 0 relatives were found. Please note that relatives living outside of the United States are not included in our search.
