RE: OPPOSITION TO SB 2393 “RELATING TO IMMUNIZATION PRACTICES” PURSUANT TO REGULATORY CAPTURE AT THE U.S. DEPT. OF HEALTH AND HUMAN SERVICES, THE CDC, AND THE ADVISORY COMMITTEE ON IMMUNIZATION PRACTICES.

TO: Honorable State Senators Baker, Chun Oakland, Dela Cruz, Kidani, Nishihara, Shimabukuro, Tokuda, Espero, Keith-Agaran, Kim, and to whom it may concern.

My name is Dr. Leonard G. Horowitz. I am the author of eighteen books and six documentary films dealing with drug industry secrets, bioterrorism risks, genetic engineering firms, and vaccination policies that are risking or damaging public health. I have repeatedly appraised government agents and agencies about the risks of multi-national corporations effecting “regulatory capture,” central to Republican Presidential candidate Donald Trump’s concerns about children given too many vaccines; and Democratic contender, Bernie Sanders’ concerns about corporatism destroying America and our capacity to secure government operations for *We The People*. These matters relate directly to SB 2393, that would be best titled, “IMMUNIZATIONS RELATING TO GENOCIDAL IMPOSITIONS BY SPECIAL INTERESTS.”

Reckless, irresponsible, seditious, and treasonous, best describes this railroading of citizens into risky and damaging mandatory intoxications—falsely claimed “safe

and effective.” SB 2393 cedes public trust and scientific discernment to grossly untrustworthy agents and agencies with purportedly no conflicting interests. “The purpose of this Act,” it is claimed, is “the rapid adoption, amendment, or repeal of rules.”

In other words, let’s just trash civility and democracy in favor of corporate fascism, legislative indifference to corporate influence, and potentially lethal administrative processes regarding what shall be injected into citizens’ bodies. These decision shall be henceforth made rapidly, secretly, and exclusively by a handful of foreign regulators outrageously biased in favor of germ theories and genetic engineering, all germ-cult members rabidly opposed to alternative views of disease and healthcare; people who are intolerant to religious beliefs, cross cultural philosophies, conflicting science, and natural medicine. Hail the CDC and members of ACIP that sets the vaccination schedule, such as Rotavirus vaccine patent holder, Dr. Paul Offit--infamous for leveraging his conflicting interests and wildly libeling the honorable Dr. Andrew Wakefield, who Offit and the corporate-controlled media made the poster boy for vicious character assassinations against anti-vaccinationists keen on a controversial publication in the *Lancet*. Therein, Dr. Wakefield and his team simply urged more study of apparent associations between the time of MMR vaccination and groups of children suffering from brain damage and digestive disorders. Scientific fraud was committed by chief CDC officials bribed to conceal these horrifying associations. Data linking brain damage to MMR vaccines, especially in African American boys, was censored. Criminal scientific evidence tampering occurred at the highest levels of the CDC. This was exposed by the study’s lead investigator, Dr. William Thompson, who was promptly blacklisted and defamed like Wakefield for revealing the censored study documents that provided prima facie evidence of the regulatory capture by agents of Big Pharma, Big Biotech, and Big Money.

Locally, according to the CDC, Dr. Sarah Park has done a wonderful job administering a petro-chemical/pharmaceutical response to the dengue fever outbreak, yet this acknowledgment demands reconsideration. The facts and documents I exhibit in the video presentation I prepared for the Hawaii County Council, and hereby submit to this committee for private viewing, evidence multi-national corporations profiting from Hawaii's dengue fever outbreaks, developing vaccines, and the weaker Zika virus threatening pregnant women and infants. Oxitec agents solicited Dr. Park to release genetically-modified mosquitoes to combat the *Aedes* vector. Others sold Bayer Corporation's Aqua Reslin—known to damage children's brains, water life, wild life, and honey bees.

In essence, Dr. Park and local health department supporters of this law are advancing strategies encouraged by concealed special interests that have similarly corrupted the National Conference of State Legislatures that has spurred this legislation. The NCSL Foundation supporters in 2013 included Bill Gates, whose foundation contributed more than a half million dollars to advance related laws after the Microsoft and MSNBC king pin lectured on the capacity of vaccines to depopulate fifteen percent of humanity, justifying Gates's "immunization" recommendations and "educational" contributions. In 2015, other large multi-national corporations contributed to support this same legislation advancing nationally, including healthcare companies clearly profiting from poisoned environments and sick and dying citizens.

For these reasons, SB 2393 should be stricken from 2016 legislative consideration, as similar legislation was struck last week in Virginia.

Thank you, in advance, for acting in good faith and good conscience by rejecting SB 2393.

Sincerely yours in accordance with public duty,

LEONARD G. HOROWITZ, DMD, MA, MPH, DNM (hon.), DMM (hon.)
